

Trace Batch

Increase collections rates, facilitate the disbursement of unclaimed funds, improve syndicate detection and enable fraud prevention

TransUnion's Trace Batch solution suite offers powerful bulk consumer trace solutions that work. We offer flexible solutions that increase tracing success and efficiencies.

Leverage TransUnion's quality information to empower your business.

Trace Batch - Quick Facts

- Extend the reach of your trace search and find the consumer you're looking for even where you have limited consumer information
- A flexible search capability that caters for limited and comprehensive search information

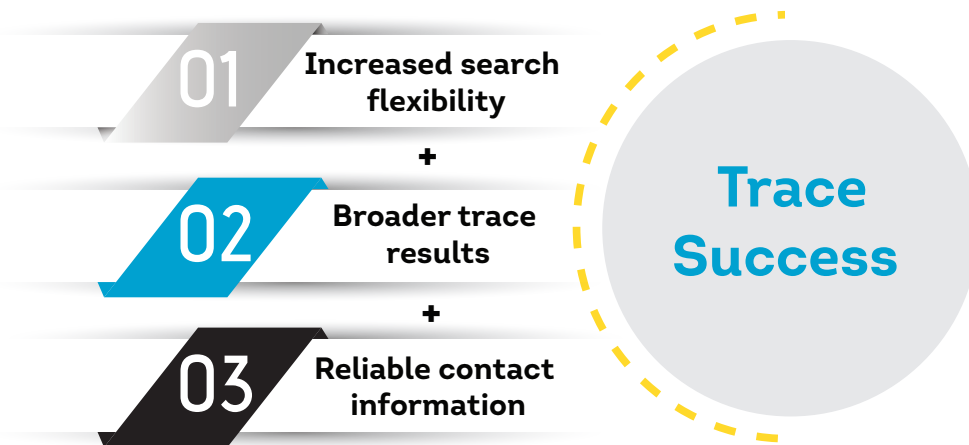

- Obtain comprehensive current contact information on all consumers who match your search criteria to ensure that you are able to successfully make contact with the consumer in question.

With Trace Batch you can find consumers using the following search options:

- Name, Surname and ID Number only
- Partial and full ID Number only
- Surname and Date of Birth only
- Partial and full Telephone Numbers only
- Partial and full Addresses only
- Any combination of the above

Benefits:

- Easy to implement with no integration required
- Fast turnaround times
- Partial and full matches returned to increase trace success
- Search flexibility that caters for very limited input formation
- Bulk processing of multiple records for cost efficiencies
- Current, reliable contact information for increased contactability

TransUnion offers tailored tracing solutions designed to solve your unique business issues; including flexible online Individual Trace capability for one-on-one transactions with visual reports, Trace Batch solutions that enable bulk tracing to realise efficiencies; as well as Trace Alerts for real-time alerts on changes to consumer contact information. Our solutions can be used in isolation or in conjunction with a range of other TransUnion solutions.
